The most powerful feature that Twitter has: Advanced search

Until recently I hadn't even heard of it, but now I use it all the time. Here are 6 twitter advanced search features that will revolutionize the way you search for what to read:

Before we get started, you might be wondering why you need advanced search? Your main feed just shows what's being posted NOW. But there's absolute gold in the old tweets from experts you love + big accounts you follow, lots of learning just waiting there for us. Here's how:

1. **Find tweets from a particular person.**
   a. Want to see what @Liz_ORiordan's been tweeting about? Just type in the search bar:
      i. from:Liz_ORiordan
   b. Want to see tweets to @LondonAllergy?
      i. To:londonallergy
   c. Combine these to see their interactions:
      i. from:Liz_ORiordan
      ii. To:londonallergy
2. **Find tweets on a specific topic.**
   a. Keywords will keep your search results on topic. Want to find what @kathevans2 has been saying about vaccinations?
      i. from:kathevans2 vaccinations
   b. But what if you want to exclude tweets about measles? Just add to the search term:
      i. -measles
3. **Find tweets that are popular.**
   a. You can set a minimum number of retweets, faves, or replies:
      i. min_retweets: x
      ii. min_faves: x
      iii. min_replies: x
   b. @OrthopodReg has been paving the way for culture change, but what if we want his most popular tweets?
      i. from:orthopodreg
      ii. Min_faves:1000

4. **Filter by a specific type of tweet.**
    a. Sometimes you might want only tweets with images or links in them:
        i. Filter:links
        ii. filter: images
        iii. Filter:media
    b. Want to find that graphic by @DrLinda Dykes on DNACPR?
        i. from:drlindadykes dnacpr
        ii. Filter:images
5. **Find tweets from a particular time period.**
    a. Add a date filter:
        i. Since:
        ii. Until:
    b. Do you remember @doc_bipolar sharing about her new blog but can't find the link?
        i. From:doc_biopolar
        ii. Since:2022-03-01
        iii. Until:2022-04-08
        iv. Filter:links
    c. Remember to use the format YYYY-MM-DD
6. **Find tweets by location.**
    a. Add a city and a distance if you want local info.
        i. near:X within:10mi
    b. If you want to hear more from Glaswegians then you just add the location tag into the search.
        i. near:Glasgow wellington

The TL;DR of how you can search:
from:twittername
keyword1 OR keyword2
min_faves:2000
min_retweets:2000
filter:links
filter:images
until:YYYY-MM-DD
since:YYYY-MM-DD
near:location within:15mi
